

Check 4 Learning OverView

The C4L OverView workshop will include a brief tutorial about major functions of the system. The session is intended for district DACs, principals, and teacher leaders. The tutorial will include suggestions for ease of use. Participants will be asked to contribute lessons that they have learned while using the system. Additional suggestions will be provided for naming classes, tests, and administrations. A major portion of the workshop will cover a review of reports and guidance about interpretation and use of the reports. The final part of the workshop will encourage participants to discuss different ways that the C4L tool can positively impact student learning.

- I. Welcome
- II. Uploads
- III. Item Bank and Test Creation
- IV. Naming Conventions
- V. Reports
- VI. Sharing Session (Districts will be asked to share how they are using the C4L system or how they are planning on using the system.)
